DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11, 15-20 and 38 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner agrees with the applicant in regards to the novelty and non-obviousness of the invention.
3. The examiner relies on the definitions of control signal and visual cue as defined in the specification and remarks.
4. The claims are drawn to a method and system of allowing computer-based interaction in broadcasts, wherein a visual cue is mixed in with a control signal, wherein a user's input device recognizes the control signal, and releases it. Thus, network information is retrieved when the visual cue and the control signal are active.
5. Of the known art, none teach or suggest the combination of a combined broadcast, the usage of a video cue associated with a control signal, the usage of control signals to obtain network information, and the particular form of user input. The claims as currently drawn are novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on visual cues and interactive broadcasting.
